

# The Roller Garage Door Co., Surrey Form

Ref: \_\_\_\_\_  
 Date: \_\_\_\_\_  
 By: \_\_\_\_\_

## NOTES

Note: all reference to Right or Left are oriented as if seen by a person stood inside the garage space

### 1. Installation Side

Fixed to the Outside of the Garage   
 Fixed to the Inside of the Garage

### 2. Fix Type (Guide Channels)

Face Fixed   
 Reveal Fixed   
 Half-Reveal

### 3. Fix Type (Box Enclosure)

Face Fixed   
 Reveal Fixed   
 Half-Reveal

### 4. Opening Sizes

Width Brick to Brick   
 Height Floor to Lintel

### 5. Space available around opening

a. Space above underside of lintel   
 b. Space to Left hand side of brickwork   
 c. Space to Right hand side of brickwork

### 6. Overall Sizes

Total Width   
 Total Height

Calculating the overall final sizes:

Overall Width  
 For Face Fixed / Half Reveal doors, add 70mm or 90mm for each face fixed guide (when the opening is less than 2500mm use 70mm, otherwise 90mm guides). Reveal Fixed doors overall width is the same as the between brick dimension.

Overall Height  
 For Face Fixed / Half Reveal doors, add 300mm or 360mm to the underside of lintel measurement. Reveal Fixed doors overall height is the same as the floor to lintel dimension.

### 7. Curtain Colour

Write the chosen colour here

### 8. Guide / Enclosure Colour

Write the chosen colour here

### 9. Override Type

Internal High Level   
 External High Level   
 External Low Level

Note: an external override will usually be required only when there is no other means of access to the garage other than the garage door itself. So, the manual winding handle will be presented to the external face of the garage.

### 10. Motor / Control side

Left (as viewed from inside)   
 Right (as viewed from inside)
